INTEGRATION REZFUSION BOOST

INTEGRATION REZFUSION BOOST

Rezfusion Setup Guide:

The Rezfusion Boost integration works off of the same logic Streamline uses for their direct HAXML Vrbo integration. All the content mapping, tax, fee, pricing and configuration settings fall into the same requirements for Boost which use the same fields within the setup of your units.

*If you are currently enabled for Streamline's VRBO integration, the setup is very simple, There are a few additional steps for you to complete before you are ready to utilize the services.

*An appointment with a Streamline integration specialist will be required if you are not currently configured for haxml logic within Streamline.

When you enable RezFusion Boost through the process explained below, a few things will automatically happen within your Streamline system.

A. 2 Boost reservation types will be auto created

- RezFusion_BOOST (PDWTA)
- RezFusion_BOOST (AIRBNB)
- B. 2 Boost Travel Agents will be auto created (PDWTA, WHL)
- RezFusion_BOOST (PDWTA)
- RezFusion_BOOST (AIRBNB)
- C. Your taxes and fees will be auto configured to your currently enabled HAFAMOLB taxes and fees for the 2 new Boost reservation types in your system.
- D. You will see BOOST icons next to any content fields within your units for content on the

Distribution Channel Settings, Room Details and Amenities tabs of each unit. All of this is auto mapped for BOOST if you have already configured your units and system for haxml.

STEP 1 - GET TOKENS

Log in to the Streamline Dashboard:

Main Menu -> Third Party Integrations -> Get Integration Tokens

STEP 2 - ENABLE UNITS

Main Menu -> Tools -> Users/Owners -> Post-Deduct Wholesale Travel Agent or Main Menu -> Tools -> Users/Owners -> Wholesale Travel Agent (for BOOST airbnb setup only)

You now have 2 automatically created Travel Agents for Boost within your system. If you are using Boost to connect with Airbnb, you will use the RezFusion_BOOST (AIRBNB) Travel agent. For all other connections, you will use the RezFusion_BOOST (PDWTA) Travel Agent.

	۵.	TREAMLIN	- 🗖 -	ŵ	¢.	ě	٩	لىد	ø	28	()	ይ

Checkbox any units you want to feed to BOOST as "Commissionable" and Submit.

Any ACTIVE/RENTING units are now enabled and feeding over to BOOST!

STEP 3 - DOCUMENTS

Main Menu -> Communication -> Manage Documents

Similar to taxes and fees, your documents have a reservation type tab which you can specify different reservation types to be enabled for your triggered Streamline documents.

If you manage your documents by specifying different reservation types, You need to make sure you enable the Boost Reservation types for the documents you would want to go out for Boost reservations.

- RezFusion_BOOST (PDWTA)
- RezFusion_BOOST (AIRBNB)

STEP 4 - TAXES AND FEES

Main Menu -> Homes -> Taxes & Fees

If you are already enabled for haxml with Streamlines Vrbo integration, your taxes and fees enabled for the **HAFAMOLB** res type have been matched to the 2 Boost reservation types.

- RezFusion_BOOST (PDWTA)
- RezFusion_BOOST (AIRBNB)

If you need to remove a specific fee, you can select the BOOST reservation type from its Reservation type tab.

If you need to create a new fee specifically for BOOST, you will need to make sure it is configured within the allowed logic for haxml. If you have any questions on this, please reach out to your Streamline account manager.

Congratulations! You are now are configured for the REZFUSION integration within Streamline. Please inform your BOOST account manager that you are ready to proceed.
